DECLARATION OF CONFORMITY

DECLARATION OF CONFORMITY OF THE MATERIAL1.4401 / AISI 316

Compledet by:	Approved by Management:	Version:	Date:	Repl.:
O. Carstensen	B. Funke	03	11.06.2025	02

Märtens Transportbänder GmbH confirms that the material 1.4401 / AISI 316 is in accordance with DIN 10528:2009-06 (6.3.2.1.) as a food contact material complies with the provisions of the Consumer Goods Ordinance and Regulation(EC) 1935/2004 in the current version of the European Parliament and of the Council of October 27, 2004 on materials and articles intended to come into contact with food.

The product is suitable for direct contact with food during transportation during the manufacturing process.

The material is processed in accordance with Regulation EC 2023/2006 (GMP) of the Commission of the EuropeanCommunity of December 22, 2006.
1. The product does not contain substances whose use is prohibited or restricted by the Consumer Goods Ordinance.is restricted.
2. the product is suitable for the following area of application
2.1 Transportation of food within the manufacturing process

There are currently no legal limits for chromium and nickel content for stainless steel food contact materials. For stainless steels, however, migration values above 0.45 mg/dm^3 (chromium) and 0.1mg/dm^3 (nickel) are considered technically avoidable (M. Hausch, Deutsche Lebensmittelrundschau. Heft 3, 1996). These values are complied with for the material 1.4401 / AISI 316.

Lead and cadmium are generally undesirable in food contact materials and, according to the “Guidelines on Metals and Alloys used as Food Contact Material” (Council of Europe's Policy Statement, 2002) to be used.
No migration of lead and cadmium could be detected in the material 1.4401 / AISI 316.

The material 1.4401 / AISI 316 can be used for direct contact with food and is therefore suitable for IFS6, FSSC 22000 and similar certificates.
